### Special Announcement

- All complete products sold by the manufacturer are delivered along with nameplates, quick setup guide and accessories after strict inspection. The manufacturer shall not be responsible for counterfeit products.
- The manufacturer will update this manual according to product function enhancement or changes and regularly update the software and hardware described in this manual. Update information will be added to new versions of this manual without prior notice.
- This manual may contain misprints, technology information that is not accurate enough, or product function and operation description that is slightly inconsistent with the actual product, the final interpretation of company is as a standard.
- This manual is only for reference and does not ensure that the information is totally consistent with the actual product. For consistency, see the actual product.

**NOTE**

For more information, please refer to our website.

### Precautions

- Fully understand this document before using this device, and strictly observe rules in this document when using this device. If you install this device in public places, provide the tip “You have entered the area of electronic surveillance” in an eye-catching place. Failure to correctly use electrical products may cause fire and severe injuries.

**WARNING**

It warns you to moderate dangers which, if not avoided, may cause minor or moderate injuries.

**CAUTION**

It warns you to risks. Neglect of these risks may cause device damage, data loss, device performance deterioration, or unpredictable results.

**NOTE**

It provides additional information.

- Avoid heavy loads, intensive shakes, and soaking to prevent damages during transportation and storage. The warranty does not cover any device damage that is caused during secondary packaging and transportation after the original packaging is taken apart.
- Protect this device from fall-down and intensive strikes, keep the device away from magnetic field interference, and do not install the device in places with shaking surfaces or under shocks.
- Clean the device with a soft dry cloth. For stubborn dirt, dip the cloth into slight neutral cleanser, gently wipe the dirt with the cloth, and then dry the device.
- Do not jam the ventilation opening. Follow the installation instructions provided in this document when installing the device.
- Keep the device away from heat sources such as radiators, electric heaters, or other heat equipment.
- Keep the device away from moist, dusty, extremely hot or cold places, or places with strong electric radiation.
- If the device is installed outdoors, take insect- and moisture-proof measures to avoid circuit board corrosion that can affect monitoring.
- Remove the power plug if the device is idle for a long time.

- If this device is installed in places where thunder and lightning frequently occur, ground the device nearby to discharge high energy such as thunder strikes in order to prevent device damage.

**WARNING**

If water or liquid unexpectedly flows into the device. If water or liquid unexpectedly flows into the device to discharge high energy such as electrical surges in order to prevent the power supply from burning out.
- When this device is in use, ensure that no water or any liquid flows into the device. If water or liquid unexpectedly flows into the device, immediately power off the device and disconnect all cables (such as power cables and network cables) from this device
- Do not focus strong light (such as lighted bulbs or sunlight) on this device. Otherwise, the service life of the image sensor may be shortened.
- If this device is installed in places where thunder and lightning frequently occur, ground the device nearby to discharge high energy such as thunder strikes in order to prevent device damage.
- If this device is installed in places where thunder and lightning frequently occur, ground the device nearby to discharge high energy such as thunder strikes in order to prevent device damage.
- If this device is installed in places where thunder and lightning frequently occur, ground the device nearby to discharge high energy such as thunder strikes in order to prevent device damage.
- If this device is installed in places where thunder and lightning frequently occur, ground the device nearby to discharge high energy such as thunder strikes in order to prevent device damage.

</tbody>
</table>

**NOTE**

Some models may only have port/power supply/reset button, but not other function, such as audio in 12V out. The figure is only for referring; Please refer to the actual product.
3 Device Installation

**WARNING**
To avoid moisture influence, install the dome cover at least half an hour after the camera is installed and powered on.

The vandal dome camera can be installed in the ceiling, wall, wall bracket or ceiling bracket. This section describes how to install the camera in the ceiling.

**Installation Steps:**
Step 1 Use the T15 screwdriver in the accessory package to unscrew the three screws on the dome cover. The camera is opened, as shown in figure 3-1.

Step 2 Stick the installation location sticker on the ceiling or wall. Drill three holes based on the marks on the sticker. Drive the plastic anchors into the holes.

Step 3 Fetch three black self-tapping screws from the accessory package. Then fix the screws to fasten the camera on the wall bracket or ceiling bracket. This section describes how to install the camera in the ceiling.

Step 4 Connect the network access port and power supply of the multi-head cables.

Step 5 Adjust the lens focal length and video angle range. 1. Press the arrows marked on the lining to remove the lining aside, as shown in figure 3-3. 2. View the video, loosen the slotted screw slightly as shown in figure 3-4 & figure 3-5, make camera’s trinaxial adjustments, adjust the screen to the scene you want to monitor, and then tighten the screws. Three-axis adjustment direction and angle are shown in figure 3-4 & figure 3-5.

4 Quick Configuration(e.g Chrome)

4.1 Login
Step 1 Open the Google Chrome, enter the IP address of IP camera (default value: 192.168.0.123) in the address box, and press Enter. The login page is displayed as shown in figure 4-1.

Step 2 Input the username and password.

**NOTE**
- The default username and password are both admin. Modify the password when users log into the system at first time to ensure system security.
- It is advised to restart camera three minutes later after modifying password to ensure modified successfully.
- You can change the system display language on the login page.

**Figure 4-1 Login**

4.2 Modify IP address
Choose Configuration > Device > Local Network. The local Network page is displayed.

Enter the IP address in the IP Address box and click Apply as shown in figure 4-2.

After the IP address is set successfully, please use the new IP address to log in the Web interface.

**Figure 4-2 Local Network**

4.3 Browsing Video
To ensure the real-time video can be played properly, you must perform the following operation when you log in the web for the first time:

Step 1 In Google Chrome, choose Control panel > Internet options > Security > Trusted sites > Sites, in the display dialog box, click Add, as shown in figure 4-3.

**Figure 4-3 Adding a trusted site**

Step 2 In Google Chrome, choose Control panel > Internet options > Security > trusted sites > Sites, in the display dialog box, click Add, as shown in figure 4-3.

Step 3 Download and install the player control as prompted.

**Figure 4-4 Configuring ActiveX control and plug-in**

4.4 Maintenance
Choose “Setting > System > Maintenance”, the Camera Maintenance is displayed, as shown in figure 4-6. Users can reboot, update and reset the camera in this page.

**Figure 4-6 Camera Maintenance**

**NOTE**
If the repair tips displayed when installing the control, please ignore the prompt, and continue the installation, the login page is displayed when the control is loaded.

To browse a real-time video, click Live Video. The Live Video page is displayed, as shown in figure 4-5.
